

**KING INDUSTRIES
JOB DESCRIPTION
Systems Administrator**

Location- Norwalk, CT

King Industries, Inc. is actively looking to hire a Systems Administrator responsible for administrative support of onsite and in-cloud server systems and infrastructure. Ideal candidates should have a bachelor's degree in computer science, Information Technology, or a related field, as well as have experience administering a Hyper-V and 4+ years managing O365, Azure DevOps, Hybrid AD and related services.

1. Skills Required

- Methodical and focused with a strong attention to detail.
- A go-getter who can stay current with systems updates technology trends.
- Team player who enjoys working with others to plan and implement robust solutions for challenging real-world problems.
- Excellent written and verbal communication with both technical and non-technical audiences
- Critical thinker who thrives when working with variety of systems across multiple platforms.
- Highly capable in the acquisition of new skills through self-study and research with the ability to apply new knowledge to current challenges and formulate solid solutions.
- Strong understanding of Microsoft Azure services – MFA, AIP, DLP, MDM, IP, PIM, AR, RBAC, DevOps.
- Advanced understanding of Microsoft environments (Power Shell, AD, GPO, Hyper-V, and DR systems).
- Must have a good balance of resourcefulness - If you do not know how to do something new, figure it out, but if you are stuck, don't spend too much time on it before asking for help.

2. Education and Experience Requirements

- Bachelor's degree in computer science, Information Technology, or a related field.
- Certifications (Security +, Network +, MCSE) is a plus.
- 3+ years of experience with O365 Enterprise implementation and administration

- 4+ years administering/upgrading Windows Server 2008 through 2019.
- Experience with Veeam, PDQ, Printer Logic, Manage Engine or other administrative tools a huge plus.

3. **Duties and Responsibilities**

- **Develop Enterprise Expertise**
Become the resident expert on our enterprise infrastructure, particularly in security-focused areas. Understand and evaluate system architecture, identifying opportunities to enhance security and optimize performance.
- **Ensure System Security and Reliability**
Proactively sustain systems with a focus on maintaining confidentiality, integrity, and availability. Implement best practices to mitigate risks and secure enterprise assets.
- **Maintain Documentation and Change Control**
Create and maintain detailed system documentation, including configurations and change management logs, to support team transparency and ensure operational consistency.
- **Execute System Maintenance and Upgrades**
Conduct regular system maintenance, updates, and upgrades to ensure optimal functionality and compliance with security standards.
- **Azure Enterprise Expansion**
Lead efforts to expand and optimize our Azure Enterprise environment, leveraging Azure tools and features to support business objectives and enhance security posture.
